(between 9.00am – 5.00pm)

Under the Direct to Hospital GP Admission patients are managed by a General Physician in hospital with a multi-disciplinary approach to their care. The program streamlines the admission process for eligible patients with health insurance - with just one call from your surgery patients can bypass lengthy waits in the emergency room and gain direct access to hospital care.

Patients we commonly treat in our Medical Admissions Ward include:

- Wound management (IV antibiotics, dressings)
- UTI (requiring IV antibiotics)
- Ulcers & cellulitis
- Dehydration
- Gout
- Pyelonephritis
- Respiratory conditions such as pneumonia
- Anaemia-Investigation
- Rheumatology and endocrinology issues
- Gastrointestinal issues
- Patients who have experienced falls

Examples of admissions that are not suitable for the Medical Admissions Ward include:

- Acute surgical abdomens
- Patients with chest pain
- Patients suspected of a heart attack or other conditions which require intensive workup
- Patients exhibiting violent behaviour
- Rehabilitation and respite
- Patients under the age of 16
- Patients classified under the Mental Health Act.

Patients over the age of 80 or requiring significant allied health input, will need to be screened.
